Dear Interested Party:

The State of Alaska is pleased to announce that an application cycle for the Community Development Quota (CDQ) Program will be held for multi-species CDQ for 2003-2005. This application process is entered into under the authority of federal regulations 50 CFR 679.30 and state regulations 6 AAC 93.

The following attachment describes the various requirements needed to complete the application. With the exception of the attached tables at the end of the application, the packet is similar to the application distributed during the previous allocation period.

Please be apprised that the Community Development Plan (CDP) and the multi-species allocation cycle will be in effect for the term 2003-2005, a three-year period.

If your CDQ group does not have a current CDP on file with NMFS, please contact the state to verify if your community is eligible for a Bering Sea/Aleutian Island CDQ allocation under 50 CFR 679.30.

If you have any questions, please contact:

APPLICATION PACKET INSTRUCTIONS

Introduction

2003 – 2005 CDP Applications: Community Development Plan (CDP) applications for the Multi-Species Community Development Quota (CDQ) Program are to be submitted to the Governor of Alaska. The Governor, the Commissioners of the Departments of Community and Economic Development and Fish and Game and their staff, will evaluate the applications and make recommendations of quota allocation for groundfish, crab, and associated bycatch species in the Bering Sea and Aleutian Islands. The recommendations will be presented to the North Pacific Fishery Management Council (NPFMC) and then submitted for final approval to the U.S. Secretary of Commerce through the National Marine Fisheries Service (NMFS).

The applications are being accepted under federal regulations 50 CFR 679.30 and State of Alaska CDQ regulations under 6 AAC 93. The application is required to meet the standards outlined in state and federal regulations.

Eligible Applicants: Communities that are eligible to receive community development quotas must be located on or within 50 nautical miles of the Bering Sea coast from the Bering Strait to the westernmost part of the Aleutian Islands, or located on islands within the Bering Sea. A list of eligible communities is listed in the federal regulations, 50 CFR 679.30, Table 7. Applications may be submitted by local fishing organizations or local economic development organizations incorporated for the purpose of designing or implementing a Community Development Plan, from eligible communities or groups of communities.

General Application Contents: The applicant must submit seven (7) copies of the CDP application in new binders to the State of Alaska (with a petition of confidentiality if necessary) through the Department of Community and Economic Development. Each of these copies should be three-hole punched.

Applications must address the level of local employment that will be generated, the vocational and educational programs created for local residents, and the schedule for moving from reliance on CDQs to self-sufficiency. Applications must also include detailed information on the management of the quota and how the applicant intends to use the revenues generated by their allocation. This includes detailed business plans of proposed ventures with copies of proposed contracts. Budgets, which outline expenditures for proposed and active projects for the allocation period, are required.

A specific application format has been developed. To be considered for quota allocation, this format must be followed. A checklist has been provided to ensure compliance.

Allocation Timeline: The final date for applications to be accepted is July 1, 2002. Upon receipt of the CDP applications, the state will review the applications. Following the review, a public hearing will be held to give all interested parties the opportunity to comment on the proposed CDPs. The public hearing is scheduled for August 27, 2002.

APPLICATION PACKET INSTRUCTIONS

Introduction

The allocation recommendations for 2003 – 2005 will be made based on species groupings, bycatch and Prohibited Species Quota (PSQ) needs. Species groupings, also referred to as a target fishery for pollock, will be identified in one fish plan. The state's allocations will be based on this target fishery and the level of bycatch necessary to successfully prosecute the target fishery. Final allocation recommendations will be given to the Governor following the public hearing. The state's final allocation recommendations will be forwarded to the U.S. Department of Commerce, through the National Marine Fisheries Service for approval.

Use of a Bycatch Matrix: To assist in determining bycatch and PSQ needs, the state has developed a matrix for various target fisheries. Using historical data, the matrix will focus on the pollock target fishery based on species, gear type, and location. The matrix will be used for guidance in the allocation. Note: It is anticipated that bycatch and PSQ may be exceeded which may require across the board reductions on a pro rata basis.

Evaluation Criteria: Because the total amount of quotas is limited, applications are evaluated in competition with each other. Please refer to federal and state regulations under 50 C.F.R. 679.30(a) and 6 AAC 93.040 in addition to the following factors for consideration, which include, but are not limited to:

- the application's objectives,
- realistic measurable milestones for determining progress,
- previous ability to manage a Community Development Plan,
- methods for developing a self-sustaining local fisheries economy,
- level of career track employment and training opportunities,
- capital or equity generated for local fisheries investment,
- profit-sharing arrangements,
- diversity in harvesting/processing partners and modes of operations,
- coordinated activities with other CDQ group(s),
- investments with experienced industry partners,
- ability of a CDQ group to maintain control over allocations,
- involvement and diversity in all facets of harvesting and processing operations,
- depth of seafood related infrastructure development,
- stimulation on Alaska's economy in both CDQ and non-CDQ communities,
- conservative and sound management principles in the fishing plan which provide for full retention and utilization of quota, and
- the development of innovative products and processing techniques aimed at conservation and maximum utilization.

It is important to keep in mind that CDQ organizations often collectively request a greater amount of quota than what is available. Should a CDQ group receive less quota than requested, the Community Development Plan application will need to be revised to reflect the amount of quota awarded. This final document will be the Community Development Plan, which the appropriate agencies will keep on file for the CDP cycle.

APPLICATION PACKET INSTRUCTIONS

Introduction

Two Part Application: Experience with Community Development Plans (CDPs) in the past has placed an emphasis on reducing the burdensome paper exchange which occurs when plan amendments are submitted. Further, there is a need to separate information between that which is necessary for an application versus that which is necessary for an application review and to manage and monitor daily operations. The state has addressed many of these issues by developing substantial revisions to the application format. Applicants are strongly encouraged to follow these instructions and recommendations.

This application will be divided into two parts. Part One (Community Development Plan Application information) will not generally necessitate amendments when changes occur. Part One information is necessary for the development of the application of quota, and while it represents very important information in establishing an applicant's qualifications and evaluating a CDP, it does not impact daily operations. Changes to information located in Part Two will be provided by the CDQ group at the beginning of each new-year or as needed, and be submitted through a technical amendment process.

Part Two (Community Development Plan information) contains information which is applicable to the day-to-day operations of the CDQ group, the state, and NMFS. The applicant throughout the term of the CDP should amend the information in Part Two. Part Two information is required by program regulations, and has been developed through past practice and current reporting measures.

APPLICATION PACKET INSTRUCTIONS

CDP Multi-Species Application Format

When drafting your 2003 – 2005 (three-year) application, follow the order of items as provided in the following CDP Application Format list. As the state and NMFS will rely on consistency among the various CDPs, **applications which do not follow this format will be returned to the applicant.**

C. For each target fishery, provide the following forms for each proposed vessel or processor to be used:
1. Fishing Plan for Motherships and Catcher/Processors Using Trawl Gear;
2. Fishing Plan for Catcher/Processors Using Non-Trawl Gear;
3. Fishing Plan for Catcher Vessels 60 feet LOA or Greater Using Trawl Gear Except Vessels Delivering Only Unsorted Codends to Another Vessels;
4. Fishing Plan for Catcher Vessels 60 feet LOA or Greater Using Non-Trawl Gear;
5. Fishing Plan for Catcher Vessels Less than 60 feet LOA Using Any Gear and Catcher Vessels of any Length Delivering Only Unsorted Codends to Another Vessels; and
6. Fishing Plan for Shoreside Processors Taking Deliveries from Catcher Vessels Groundfish CDQ Fishing.
D. For each crab target fishery, provide:
1. CDQ organization contact, including:
a) Name, address, phone and fax numbers;
2. Plan to prevent overages;
3. A description of the target fishery:
a) Proposed fishing periods (be specific on start and stop days),
b) Gear storage plans,
c) Number of pots,
d) Tank inspections, and
e) Any other pertinent information;
4. Vessel information:
a) Harvesting partner, including contact name, address, phone and fax numbers,
b) Vessel name,
c) Federal permit number,
d) ADF&G vessel number,
e) Length over all (LOA),
f) Vessel type,
g) Will vessel also fish in the main License Limitation fishery,
h) CFEC card number (when known),
i) USCG safety approval,
j) MCI or equivalent MARSAT communication capability, and
k) Vessel diagram showing:
(1) Location of observer accommodations, including sleeping and work areas,
(2) Weighing station, and
(3) Observer sampling station;
5. Shoreside processor/Buying station information:
a) Processing partner, including contact name, address, phone and fax numbers,
b) Proposed delivery site, and
c) Other information as required.

APPLICATION PACKET INSTRUCTIONS

Specific Information

Below is a breakdown of the necessary application items with specific information provided in the right column for clarification. Refrain from providing information in Part One that is best suited for Part Two.

I. Executive Summary

- A. Name of Applicant.
- B. Table of total CDQ and PSQ allocation request in percent (PSQ request for 2nd tier only).
- C. Communities represented within the application.
- D. Description of the managing organization.
- E. Goals/objectives and milestones of the CDP.
- F. Description of the CDP projects in the proposed CDP.
- G. Management strategy to accomplish CDP projects.
- H. Description of the target fisheries.
- I. Harvesting & processing partner information.
- J. Benefits to the region.
- K. Level of local participation.
- L. Other.

It is the intention of the State of Alaska to release the executive summary for public review; as such, do not include confidential information.

INTRODUCTION

Part One. Community Development Plan Application Information

I. Demographic Information:

- A. Availability of work force from communities.
- B. Number and percentage of low-income persons residing in each participating communities.
- C. Current fisheries infrastructure in the region, including:
 - 1. Barriers to entry into existing fishing industry.
- D. Other demographic information which may assist in the evaluation of the application.

In this section, the applicant needs to demonstrate, on behalf of its communities, the need for CDQ.

development of a community or group of communities that are represented by a CDQ group. These project forms are provided under Attachment 3.

- B. Comprehensive Milestone Table for all
1. Proposed projects listed in Part II, Section A; and
 2. Active projects listed in Part II, Section A.

These tables are the accumulation of the project forms provided in Part II, Section A. These tables will be included in the quarterly reports to the state.

II. Budgets

- A. General budget for entire CDP period by calendar year, including:
1. Income from all CDQs and CDP projects; and
 2. Expenditures for all projects and administration.

Please keep this General Budget to one page.

- B. Detailed current year annual budgets listing:
1. Income from all CDQs and CDP projects as reflected in the projects listed in Part II, Section A, and see Attachment 6, Table 2;
 2. Expenditures for all projects as reflected in the projects listed in part II, Section A; and
 3. Administrative expenses - detailed with administrative expenses by project, and see Attachment 6, Table 1.

The budget will be submitted annually. Detail is important for the administrative expense budget. Project budgets may have administrative expenses allocated, however, those expenses must be clearly separated from other expenses and be presented in the administrative expense budget.

III. Fish Plan

- A. Table of total CDQ and PSQ allocation request in percent (PSQ request for 2nd tier only).
- B. Table of necessary CDQ target and bycatch quota, and PSQ quota requests by target fishery in percent.

The complete table with all the fish species is provided on Attachment 1.

See attachment 2.

Recommendations

The following is a list of general recommendations, which will eliminate problems down the road.

1. Do not put specific dollar amounts in the Community Development Project section. Rather, cite the budget page or use a range.
2. When developing the application, use the same outline as provided in the Application Format List. For instance, your annual administrative budget would be under Part Two II.B.3. In addition, the checklist must also cite the location of the administrative budget using the same reference. This will eliminate amendments to the checklist and maintain it as an effective reference tool.

Confidentiality Information

Requirements

It is the responsibility of each CDQ group to ensure a petition of confidentiality is included with any CDP or amendment which contains confidential information, as required by 6 AAC 93.070 (see state regulations at the end of this booklet). Each time an item is sent to the state for consideration, the document should be reviewed for confidentiality status. Failure to comply with the requirements of this section could potentially result in the documents being considered public and made available to the public upon request.

Each page containing confidential information should be clearly stamped or noted as confidential in the upper right hand corner. **Any confidential document: 1) which does not have a confidential petition attached; 2) is not stamped or noted as confidential; or 3) any copies of confidential documents which are stamped as confidential, but the confidential stamp is not legible on the final copy, will be distributed to any agency or individuals upon request.** It is the responsibility of each CDQ group to ensure these requirements for maintaining confidential information are met.

III. Fish Plan	
A. Table of total CDQ and PSQ allocation request in percent (PSQ request for 2nd tier only).	
B. Table of necessary CDQ target and bycatch quota, and PSQ quota requests by target fishery in percent.	
C. For each target fishery, provide the following forms for each proposed vessel or processor to be used:	
1. Fishing Plan for Motherships and Catcher/Processors Using Trawl Gear;	
2. Fishing Plan for Catcher/Processors Using Non-Trawl Gear;	
3. Fishing Plan for Catcher Vessels 60 feet LOA or Greater Using Trawl Gear Except Vessels Delivering Only Unsorted Codends to Another Vessels;	
4. Fishing Plan for Catcher Vessels 60 feet LOA or Greater Using Non-Trawl Gear;	
5. Fishing Plan for Catcher Vessels Less than 60 feet LOA Using Any Gear and Catcher Vessels of any Length Delivering Only Unsorted Codends to Another Vessels; and	
6. Fishing Plan for Shoreside Processors Taking Deliveries from Catcher Vessels Groundfish CDQ Fishing.	
D. For each crab target fishery, provide:	
1. CDQ organization contact, including:	
a. Name, address, phone and fax numbers;	
2. Plan to prevent overages;	
3. A description of the target fishery:	
a. Proposed fishing periods (be specific on start and stop days),	
b. Gear storage plans,	
c. Number of pots,	
d. Tank inspections, and	
e. Any other pertinent information;	
4. Vessel information:	
a. Harvesting partner, including contact name, address, phone and fax numbers,	
b. Vessel name,	
c. Federal permit number,	
d. ADF&G vessel number,	
e. Length over all (LOA),	
f. Vessel type,	
g. Will vessel also fish in the main License Limitation fishery,	
h. CFEC card number (when known),	
i. USCG safety approval,	
j. MCI or equivalent MARSAT communication capability, and
