FOOTNOTE:

APICDA's overall population numbers vary considerably due to the numbers reported by the 2000 U.S. Census data for Akutan. The Census Bureau attributed several hundred seasonal employees, who work at the nearby Trydent Processing facility, as Akutan residents. However, there is significant evidence to demonstrate that the employees do not qualify as Alaska residents and are not year-round residents of the community of Akutan. In APICDA's 2001-2002 CDP, Akutan is listed at 85 people. In APICDA's 2003-2005 CDP, Akutan is listed at 90 people.
